

# Technical and Historical Quiz Results - Overall

Scores for overall awards are calculated by multiplying the number of correct general questions (first number in parentheses) by 3 and adding the the number of correct model specific questions (second number in parentheses). Note that the number of model specific questions correct may be higher than in the model specific results due to model specific questions thrown out due to protest in other classes.

Questions 56, 59, 71, 72 and 74 were treated as correct for all entrants in the scoring of overall results.
